

RESUME

Hatim Slami

Python (Django) & Full-Stack Web Developer | Information Engineer

hatimslami81@gmail.com · 0936317358 · linkedin.com/in/hatim-slami

Professional Summary

Information Engineer and Full-Stack Web Developer specializing in robust backends with Python & Django REST Framework, React frontends, and production WordPress / WooCommerce platforms. Experience shipping multi-role marketplace APIs, realtime GPS tracking, JWT/OTP auth, and high-converting business websites.

Experience

Backend Engineer — Valley Order

Jibran | Multi-role delivery marketplace

- Built production API for Customer / Provider / Captain / Admin on Django REST, Daphne/Channels, PostgreSQL, and Redis.
- Implemented OTP SMS auth, dynamic delivery pricing, FCM notifications, coupons, and full order lifecycle.
- Designed hybrid live GPS tracking with NestJS Socket.io sidecar sharing JWT and Postgres.
- Delivered landing/legal/support APIs, OpenAPI docs, Jazzmin ops, Docker dual-env Dev/Prod, and GitHub Actions CI/CD.

Python & Django Programmer

APIs | Databases | Backend tools

- Developed RESTful APIs and database schemas with clean models and JWT-ready auth patterns.
- Built maintainable service layers and backend tooling in Python and Django.

Website Creator & Designer — Adam Events

WordPress | adamevents.net

- Designed and delivered interactive WordPress event platforms with conversion-focused UX (Elementor Pro).

Developer — Ademixvet

WordPress | ademixvet.com

- Custom WordPress infrastructure, frontend adjustments, and production technical optimizations.

React Frontend Developer

Restaurant & product UIs | giamaharanigroup.com

- Built React frontends: digital menus, bilingual UI, promos, and WhatsApp ordering.

Website Developer — Digital Arabic

WordPress | kochreal.com | asamena.org

- Built and maintained WordPress / WooCommerce platforms with migrations, security hardening, and speed optimization.

Selected Projects

Valley Order — valley-order.com

Marketplace backend: JWT/OTP, catalog, checkout, dynamic pricing, FCM, hybrid realtime tracking (Django + NestJS).

Boma Platform — boma.sy

Syrian e-commerce store for BOMA electrical appliances (kitchen, home, personal care) on WordPress/WooCommerce, integrated with a Flutter mobile app.

Adam Events — adamevents.net

WordPress events & conference website with dynamic layouts and booking-oriented flows.

Gia Restaurant — giamaharanigroup.com

React restaurant site in Bogor: digital menu, promos, bilingual UI, WhatsApp ordering.

Digital Arabic sites

Koch Real, ASAMENA, Ranim Real Estate — WordPress delivery for real-estate and association platforms.
